

iGentic – The Complete AI Platform for Your Organization

Drive smarter, faster, and measurable outcomes with intelligent orchestration.

Take control of your organizational AI ecosystem by driving end to end ownership, achieve compliance and data leakage prevention while driving innovation and business agility

Why Choose iGentic?

Reduce Costs
Automate tasks and optimize workflows to lower operational expenses.

Increase ROI
Automate tasks and optimize workflows to lower operational expenses.

Improve Customer Satisfaction
Automate tasks and optimize workflows to lower operational expenses.

Drive Innovation
Automate tasks and optimize workflows to lower operational expenses.

Key Features

1

Build Specialized AI Agents
Create AI agents tailored to your business needs with specific skill sets for optimal task performance

2

Automate Business Processes
Design and implement workflows with ease, assigning tasks to agents and monitoring progress in real time.

3

Orchestrate Multiple Agents
Coordinate AI agents to handle complex projects seamlessly, boosting collaboration and productivity.

4

No-code Customization
Build and adapt AI agents quickly with intuitive, drag-and-drop configuration—no coding required.

5

Seamless Integration
Utilize Microsoft's 1000+ connectors to effortlessly integrate AI agents with your business systems for smooth data flow and interoperability.

6

Transform Legacy Processes
Modernize your operations by converting existing business processes into iGentic AI agents that integrate with your current systems

7

Localized Deployment
Deploy your agents locally within your IT environment preventing data leakage and compliance issues

8

Evaluate Your Agent
Train your iGentic agents with your data for improved and specialized performance.

9

Advanced Memory & Context Management
iGentic Agents that maintain and leverage persistent, long-term contextual understanding across interactions, including user history and preferences.

10

Enterprise-Ready Security
Safeguard data with robust encryption, compliance, and scalable security built for large organizations

**iGentic Studio**
Build and configure AI agents in minutes.

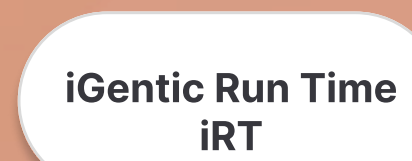

**iGentic Marketplace**
Access pre-built agentic solutions ready to deploy

iGentic Ecosystem

iGentic Run Time iRT

**iGentic Skills Catalog**
Enrich agents with specialized capabilities using pre-defined connectors & MCP servers

**iGentic Run Time**
Enterprise-grade engine powering every experience

Enterprise-Grade Security & Data Control

Cloud or On-Premise Deployment
Host iGentic within your own cloud environment or on-premise infrastructure for complete ownership, security, and control.

Compliance with ISO, HIPAA, and More
Host iGentic within your own cloud environment or on-premise infrastructure for complete ownership, security, and control.

End-to-End Encryption
Ensure data confidentiality with encryption applied during storage and transmission

Role-Based Access Control
Grant precise, permission-based access to keep information secure and organized
